Frame

Thanakorn Hongsa

Product Designer

Product designer with 7 years across fintech, e-commerce and agency work, from 0→1 products to redesigns used by millions. Now designing lending products at Ascend, I bring research and data into decisions with the teams I work with, and care about the words on screen as much as the screens.

Experience

Senior Product Designer / Ascend Money Oct 2024 - Present

Fintech · TrueMoney e-wallet and digital financial services across Southeast Asia

- Design lead for lending products used by **3M+ customers**, working with business, product, engineering and the partner bank.
- KKP Auto (car title loan, launched Apr 2026): designed the in-app journey so people can apply without a salesperson or branch visit. Proposed showing the estimated credit limit before screening, which the team adopted; **95.7%** of applicants who passed pre-screening reached their limit.
- After launch, read the funnel alongside interviews: many who stopped after seeing their limit were still deciding, not dropping out, which shifted our next step to re-engagement.
- Pay Next and Pay Next Extra (credit lines; redesign handed off, launching 2027): designed the flows from applying to asking for more with the product and engineering teams, including a path for people without a payslip.
- Debt restructuring for Pay Next and Pay Next Extra customers who fall behind (handed off, launching 2027): redesigned the offer to show each option's cost next to what the customer owes, and removed wording that shames customers, in line with Bank of Thailand guidance.
- Proposed showing the full contract number on payment slips so customers could quote it to the call centre; after compliance review, number masking moved to one app-wide setting.
- Ran a workshop for **20 designers** on how I use AI in everyday design work.

Product Designer / OOZOU May 2021 - Sep 2024

Digital product agency · design and engineering for web and mobile apps

- SCG Prompt Plus (B2B e-commerce): ran surveys and interviews, then redesigned the web shop with the team on a shared design system. After launch, new users' reliance on customer service dropped by **40%**.
- The Pizza Company and 1112 Delivery: redesigned onboarding; after the January relaunch, **22% of users** opened the app daily.

UX Designer / TWF Agency Jul 2019 - Apr 2021

UX/UI agency · research- and data-led design for brand clients

- Ad Addict (advertising news site): ran user research and card sorting to rebuild the information architecture, increasing time on page by **47%** and reducing bounce rate by 30%.
- Designed for True Coffee GO, BDMS Wellness Clinic and Betagro, from personas to prototypes.

Education

Silpakorn University Apr 2018

Bachelor of Science, Information and Communication Technology, Web and Interactive Media Design

Bangkok, Thailand

Achievement

Finalist / LINE HACK

2023 / Top 10

Projects

subsii Apr 2026

Training dashboard for a sub-4 marathon. Designed and built with AI coding tools; it pulls my Garmin data and refreshes itself twice a day.

IMES Feb 2023

Event management app on LINE Official Accounts, for organizers, their teams and attendees.
